## California New Vehicle Registrations Predicted to Increase Slightly in 2022

California Annual New Light Vehicle Registrations - 2008 thru 2022

Historical data source: AutoCount data from Experian. *2022 forecast by Auto Outlook.

New vehicle registrations in California are predicted to approach 1.9 million units this year and increase slightly from 2021.

Inflation has surged, interest rates are moving higher, gas prices have increased, and there's a war in Europe. These simultaneous events would typically push new vehicle sales sharply lower, but that's not likely to happen. Vehicle production levels, not demand, will likely be the primary driver of sales for at least the next 12 months.

## MODEL RANKINGS

## Tesla Model Y is Top Seller in State During First Quarter of 2022

The table below shows the top five selling models during the first three months of 2022 in 20 segments. In addition to unit registrations, it also shows each model's market share in its respective segment. Sales results in the First Quarter of this year were primarily determined by vehicle production and availability. New registrations of the Honda Civic and Toyota Camry, two perennial top-sellers in the state, were impacted by diminished inventories.
